

Information for referrers

Step 1

The referral form below is to be completed and signed by the referrer.
Upon completion, we request that either the referrer or the patient email the referral form to ovulationtracking@genea.com.au or fax it to (02) 9094 2211.

Step 2

When the patient is ready to start, they should call our ovulation tracking coordinators at **1300 117 698** on days 1 to 3 of their period. Full instructions on the next steps will be provided to the patient at this time.

Step 3

The patient will progress through the ovulation tracking process before a summary of results is provided to the referrer at the end of the three cycles or earlier if pregnancy occurs.
Genea offers three tracking cycles to ensure the best possible chance of success.

Further information about the service can be found on our website at genea.com.au

***All mandatory fields must be completed.**
